

## Fire and Forest Health Mitigation Indian Mountain Park 2025

Mitigation was done at the very top of Indian Mountain in the summer of 2025.

Treatment Units 1 – 4 were treated, see the map below. Slash was dealt with by a lop and scatter method and the trees were left with contact to the ground so they will rot as quickly as possible. There was no way to remove or chip the wood as there is only a single track trail up there surrounded by big rocks, and the slopes are steep.

If you have any questions, please call 719-836-9043, Wed – Sat, 9am – 1pm.
